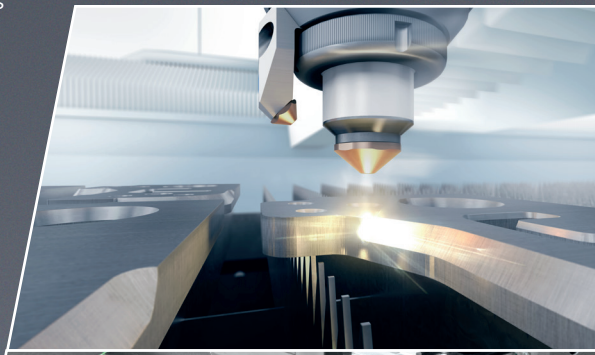
ONESITE LASER

LASER

Operating 24 hours a day our suite of Trumpf fiber lasers equipped with the latest technology offer you

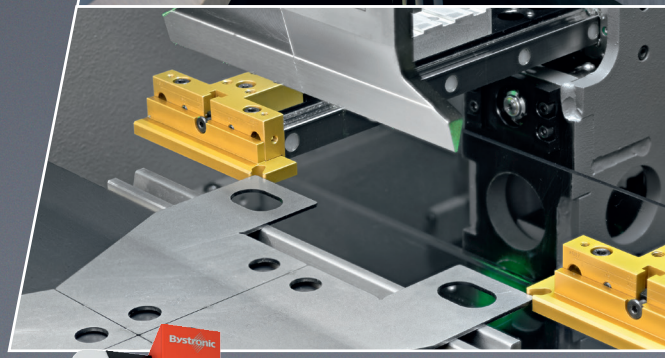
- ✓ Short lead times
- ✓ Competitive prices as we can cut twice the speed of standard fiber lasers
- ✓ Superior quality using BrightLine and CoolLine technology
- ✓ Your own dedicated Account Managers providing quick prices and order progress support



FORMING

Our CNC press shop can offer a complex forming service on laser cut parts

- ✓ Full range of standard tooling up to 4M
- ✓ Selection of special tooling for joggles, safety edges and deep pressing
- ✓ Accuracy and repeatability using latest the CNC press technology supported by our highly experienced and talented press setters



MACHINING

Additional value-added services include

- ✓ Drilling
- ✓ Tapping
- ✓ Countersinking
- ✓ Pemming

FINISHING

In house we can offer a variety of finishes to your laser cut plates

- ✓ Large rumbling facility to create a clean surface and edge finish to your laser cut parts
- ✓ Loewer swing grinder for deburring and edge rounding
- ✓ Fladder 200 Cyro - Large capacity edge and hole deburring machine - 3000 x 1200 max finished part size

LASER MARKING

Whether for part identification and traceability or promotional materials we have you covered with our Laser Marking System

- ✓ Laser marking lasts longer compared to conventional methods
- ✓ Gentle on the material with no tool or material wear
- ✓ Meets more stringent demands on traceability of raw materials
- ✓ Minimal set up so can produce quickly and competitively

PARTNERS

Although we carry out as many operations as possible in house we do work with some excellent partners that support us to offer extra value services such as

- ✓ Zinc plating
- ✓ Powder coating
- ✓ Polishing
- ✓ CNC machining
